SKILLS

Problem Solving skill in Machine Learning.

Error detecting and debugging in Python.

Developing Frontend with HTML and Bootstrap & CSS.

Working with Django webframework.

Using AI tools like Chatgpt , BlackboxAI etc.

LANGUAGES

Python
Limited Working Proficiency

HTML
Professional Working Proficiency

Bootstrap
Limited Working Proficiency

CSS
Limited Working Proficiency

INTERESTS

Machine Learning

Frontend Development(Using HTML & Bootstrap , CSS)

BALAJI P

EDUCATION

B.sc. Artificial Intelligence & Machine Learning
Sree Saraswathi Thyagaraja College Thippampatti , Pollachi.

08/2022 - 05/2025

Pollachi , Coimbatore.

PERSONAL PROJECTS

Tony Strak(Voice Assistant)

It can assist you in many fields.

Titanic Survival Project

It cantell survival rate of the person travelled in Titanic Ship.

Breast Cancer Analysis

It can predict the level of the cancer.

Iris Flower Classification

To categories iris flower into their species.

UNDERGOING PROJECTS

Stock Price Prediction

▫ Aim to forecast the future prices of stocks based on historical data and potentially other market indicators.

Fraud Detection

▫ Aim to identify fraudulent activities in different domains, such as credit card transactions, insurance claims, or online services.

Fake News Detection

▫ With the proliferation of information online, distinguishing between real and *fake news* has become crucial. This project uses machine learning to predict the fake news.

Recommendation System

▫ *Recommendation systems* are algorithms that suggest relevant items to users (like movies, books, and products) based on their preferences and past behaviors.

CERTIFICATES

Python in Guvi

Verified Certificate Id : d512UAQ66886W15nS9

Machine Learning with Python(ML0101EN , provided by IBM)

Data Minning(NPTEL Online Certification)

Consolidated Score : 56%
